

ORTHOPAEDIC SURGERY

Mission in Njinikom Hospital

Sr. Nicoline Munyar, Administrator, St. Martin de Porres Hospital, Njinikom

A group of eight children with physical disabilities, ranging from 9 to 16 years of age were accompanied by Sr. Geneviva Njah, on mission in the Far North Region of Cameroon to St. Martin de Porres Catholic Hospital Njinikom on April 16, 2023, as is done, at least, once a year.

These had varying lower limb deformities that needed various ortho-

paedic surgical corrections. The operations done by our orthopedic surgeon, Dr. Lazare were all successful.. Their post-surgical nursing care has warranted a three-month hospitalization whereby our trained nursing team has been administering to them. The patients would be ready for the next stage, which is physiotherapy in SAJOCAH, Bafut by the last week of June. ASHIA Cameroon, our first line partner association in this program for many years, evacuates children from northern Cameroon with various disabilities to specialized hospitals all over the Country.
